How to Perform a Time Study

A time study is the most common method to obtain a standard time and is accurate for most assemblies, being very accurate for any cyclical assembly. A cyclical assembly is an assembly that repeats the same cycle each time the assembly is completed. Performing a time study consists of 3 main tasks. The first task involves observing and setting up.

The Clothes Study AT A GLACE Exploring the Topic

- Introduce the study to families by sending a letter of explanation. Ask them to bring in items such as household simple machines (eg, lemon squeezer, tongs, tweezers, and screw-top bottles) and books or photos of simple machines to add to the classroom collection.
- Encourage families to help their children look around their homes for

Case Studies

Case Study #2 - Fatality by Dough Mixing Machine. A 15-year-old male pizzeria worker was killed when he became entangled in a machine used to mix pizza dough (see photos below).
