Driving from Japan May 02 2020 This study chronicles the success of the Japanese car in America. Starting with Japan's first gasoline-powered car, the Takuri, it examines early Japanese inventors and automotive conditions in Japan; the arrival of Japanese cars in California in the late 1950s; consumer and media reactions to Japanese manufacturers; what obstacles they faced; initial sales; and how the cars gained popularity through shrewd marketing. Toyota, Honda, Datsun (Nissan), Mazda, Subaru, Isuzu, and Mitsubishi are profiled individually from their origins through the present. An examination follows of the forced cooperation between American and Japanese manufacturers, the present state of the industry in America, and the possible future of this union, most importantly in the race for a more environmentally-sound vehicle.

Racing under the Illusion of Grandeur: A Guide for Men and Women over Forty Who Want to Drive like Mario Nov 07 2020 In 2006, a nearly fifty-year-old Russ Rosenberg had an epiphany. For years, he had been searching for a hobby that would hold his interest. After trying Guitar lessons, shooting sports and fly fishing, Russ tapped into his lifelong passion for cool cars. A short time later, he bought a used Miata, signed up for autocross school, and eventually began road racing. In a comprehensive guide, Russ relies on his experiences as an amateur racer to provide a roadmap for beginner racers that offers time-tested wisdom on how to start in the sport, avoid costly mistakes, and secure a logical path to success. He includes valuable insight into how to choose the right car and the true cost of racing as well as entertaining racing stories for the over-forty crowd, photos, resources, and an honest opinion on the sport from his wife, Lisa. " ... A must read for anyone who is considering getting involved in racing ..." -Tony Parella, CEO, Sportscar Vintage Racing Association

Porsche 914 Feb 29 2020 The Porsche 914 was born into consistently confusing and troubled times at Porsche and Volkswagen, not least with the idea of a non-911 Porsche horrifying many at the time. A Porsche with an engine that wasn't in the back was simply unthinkable. Richard Gooding examines the story of a car of mixed parentage, which against the odds became a success in its relatively short, six-and-a half year lifespan. Around 119,000 cars were sold from 1969 to 1975, outselling contemporary rivals such as the Opel GT, and meaning it was the first mid-engined car to achieve six-digit sales. As a present-day classic, although challenging to some, low-slung looks and bright colours make the 1970s 914 period-perfect. Combined with near-ideal weight distribution and a low centre of gravity, its mid-engine layout means the 914 can achieve cornering G-forces comparable to the contemporary 911. The 914 was seen as a car that could inject a shot of glamour into VW's slightly worthy and dependable range of air-cooled cars. This book covers the history, development and manufacture of the 914 through troubled times at Porsche and Volkswagen and studies the impact of its design upon its successors. Buying and owning a 914 today is covered, and the book is illustrated with 218 colour photographs.
