The Brave Learner Oct 07 2020 Publishers Weekly bestseller · A joyful and accessible homeschool guide to making learning a part of everyday life Parents who are deeply invested in their children's education can be hard on themselves and their kids. When exhausted parents are living the day-to-day grind, it can seem impossible to muster enough energy to make learning fun or interesting. How do parents nurture a love of learning amid childhood chaos, parental self-doubt, the flu, and state academic standards? In this book, Julie Bogart distills decades of experience--homeschooling her five now grown children, developing curricula, and training homeschooling families around the world--to show parents how to make education an exciting, even enchanting, experience for their kids, whether they're in elementary or high school. Enchantment is about ease, not striving. Bogart shows parents how to make room for surprise, mystery, risk, and adventure in their family's routine, so they can create an environment that naturally moves learning forward. If a child wants to pick up a new hobby or explore a subject area that the parent knows little about, it's easy to simply say "no" to end the discussion and the parental discomfort, while dousing their child's curious spark. Bogart gently invites parents to model brave learning for their kids so they, too, can approach life with curiosity, joy, and the courage to take learning risks.

Principles of Mathematics Book 1 Teacher Guide Sep 05 2020 Teacher Guide for Book 1 of the Principles of Mathematics - Biblical Worldview Curriculum for junior high! Math is a real-life tool that points us to God and helps us explore His creation, yet it often comes across as dry facts and meaningless rules. Here at last is a curriculum that has a biblical worldview integrated throughout the text and problems, not just added as an afterthought. The resources in the Teacher Guide will help students master and apply the skills learned in the Student Textbook. What does this Teacher Guide include? Worksheets, Quizzes, and Tests: These perforated, three-hole punched pages help provide practice on the principles taught in the main student textbook. Answer Keys: The answers are included for the worksheets, quizzes, and tests found in this Teacher Guide. Schedule: A suggested calendar schedule is provided for completing the material in one year, though this can be adapted to meet individual student needs. There is also an accelerated schedule for completing the material in one semester. Are there any prerequisites for this course? This curriculum is aimed at grades 6-8, fitting into most math approaches the year or two years prior to starting high school algebra. If following traditional grade levels, Book 1 should be completed in grade 6 or 7, and Book 2 in grade 7 or 8. In Book 1 students should have a basic knowledge of arithmetic (basic arithmetic will be reviewed, but at a fast pace and while teaching problem-solving skills and a biblical worldview of math) and sufficient mental development to think through the concepts and examples given. Typically, anyone in sixth grade or higher should be prepared to begin. The focus of the course is actually learning math for life, not simply preparing to pass a test.

Just for Teen Guys - Do-It-Yourself High School Feb 08 2021 Do It Yourself Homeschooling Handbook Library Based Curriculum Journal and Study Guide For Eclectic High-School Students 496 Page Handbook and Portfolio. Normal Price \$49.60 SALE! This Teen Journal will give your son the freedom to pick and choose his own schoolbooks, give him the guidance he needs and minimal help from an adult. Complete 12 pages a day and the journal will last 6 weeks! This journal covers science, history, English/Grammar, Nature Study, Spelling, Creative Writing, Economics and Finance, all you need to add is a math program. Activities Include: Daily Summaries: each day your teen will write a paragraph or summarize what he learned using the activity pages in his journal. Instead of having your child answer questions or fill-in-the blanks he'll summarize and tell back via writing what he learned. Start Your Day! - this page has space for your teen to write the date, a verse or quote and a prayer list. It also instructs your child to choose four books from their stack for reading that day. Reading Time - this page will have your teen write a summary from one of their books and illustrate it. Drawing Time - this is a fun page. Your teen will add something to an illustration. Science Page - after your teen reads about science either from a library book or textbook he will have the opportunity to write what he learned and illustrate it as well. History Page - once done with reading about history your teen can make a mini timeline and write about someone or place in time that he learned about. A great way to document what he's learning. Math, Finance, & Economic: My Notes - your teen can use this to write math problems or jot down what they are learning about in finance and/or economics. Copywork - have your teen copy something that stood out to him or an interesting paragraph. English Page - instead of answering English/grammar questions, have your teen tell back what he learned. This is a great way to remember what was learned. If your child is studying a foreign language like Latin, have him tell you via the English page what grammar concept he learned. Nature Study - this page gives your son a chance to go outside and draw what he sees, whether it's the house next door or a beetle on the back porch. He can also write something about it too like a fun fact, something silly, or his thoughts about what he saw and illustrated. Spelling Time - your son can choose a letter and find words that either start or end with it but to make it more challenging he'll have to five nouns, compound words, adjectives, verbs, and proper nouns. Once he finds the words he can write a story, poem, song, or play using the words. He can make silly sentences or try using as many words in one sentence too! He'll also get to illustrate it or make a comic about it using the boxes (strip) below. Film Study - watch an educational film, tutorial, or documentary and write a review about it, draw a few scenes, and rate it! This is a great way to document what your teen is learning in a fun way that doesn't boggle him down with nonsense like answering a lot of questions in a workbook that he'll soon forget. Instead your child can use real books or audiobooks for science & history, books that they have picked out and want to read! This Do-it-Yourself Homeschool Journal is great for teens with Dyslexia, Asperger's Syndrome, ADHD, and other learning challenges. Sarah Janisse Brown is a dyslexic therapist and creator of Dyslexia Games (www.dyslexiagames.com). Sarah has helped many moms Flip to Fun-Schooling using her Curriculum Journals. This homeschooling journal is great for busy families, homeschoolers, eclectic learners, Charlotte Mason inspired, and delight directed learners. Even some textbook moms have found success using this method with their boxed curriculum.

Designing Your Own Classical Curriculum Nov 19 2021 Home educator Laura Berquist presents a modern curriculum based on the time-tested philosophy of the classical Trivium—grammar, logic and rhetoric. She has given homeschoolers a valuable tool for putting together a "liberal arts" curriculum that feeds the soul, as well as the intellect. Her approach, covering grades K - 12, is detailed and practical, and it is adaptable by parents and teachers to any situation. This third revised edition includes a much expanded section for a high school curriculum, and an updated list of resources for all grades.

Elementary Geography Jun 22 2019 This little book is confined to very simple “reading lessons upon the Form and Motions of the Earth, the Points of the Compass, the Meaning of a Map: Definitions.” The shape and motions of the earth are fundamental ideas—however difficult to grasp. Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason

The Three R's Mar 12 2021 Three resources in one ? READING, WRITING, and ARITHMETIC! Learn how to take the mystery out of teaching the early grades with this practical, down-to-earth guidebook from Ruth Beechick. The book is divided into three sections that are tabbed for easy reference. The READING section tells how and when to begin phonics, and how to develop comprehension skills. The LANGUAGE section shows how to develop written language skills naturally, in the same way children learn oral language. The ARITHMETIC section explains how to teach understanding of math concepts, and not just memorization of facts.

Uncovering the Logic of English: A Common-Sense Solution to America's Literacy Crisis Aug 17 2021 "English is so illogical!" It is generally believed that English is a language of exceptions. For many, learning to spell and read is frustrating. For some, it is impossible... especially for the 29% of Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide Uncovering the Logic of English challenges the notion that English is illogical by systematically explaining English spelling and answering questions like "Why is there a silent final E in have, large, and house?" and "Why is discussion spelled with -sion rather than -tion?" With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess The author's inspiring commentary makes a compelling case that understanding the logic of English could transform literacy education and help solve America's literacy crisis. Thorough and filled with the latest linguistic and reading research, Uncovering the Logic of English demonstrates why this systematic approach should be as foundational to our education as 1+1=2.

Homeschooling Tips for Parents Guide to Understanding the Homeschool Curriculum May 14 2021 Homeschooling parents have a single thing in common, the desire to teach their child the best that they can. It is important for parents to remember the process of homeschooling is a large learning curve for both the student and the parent and mistakes are common in the beginning. The thing homeschooling parents must consider is that these mistakes can be looked upon as positive learning experiences later on. This book focuses on creating that perfect homeschool curriculum for the parent to begin teaching their child the right way.

For example your daughter may want to learn more about Victorian clothing, photo editing, baking cupcakes, babysitting, travel to Italy, nutrition, and pioneer life, now all you need to do is get a stack of books and movies about these topics. Maybe you have a son who is into World War 2, weapons, airplanes, fast cars, space, dinosaurs and tree houses. You would get books and movies about these topics for him. The purpose of this 6 week homeschooling plan is to give homeschooling moms a break while the children use this study guide. We know that moms have seasons in life where sickness, new babies, holidays, moves and transitions limit the homeschooling process. Many parents are using the journals year round, a few days a week. With this program your children will thrive and learn unforgettable lessons while you get the rest you need or focus on other things without feeling guilty that your children have been "unschooling" for too long. This handbook is as fun as unschooling but provides the structure and freedom children need. This curriculum was created by a mother of ten children who is also a Dyslexia, ADHD and Asperger's Syndrome specialist. This is the curriculum she designed for her own children who have special requirements for learning. For example the font used is perfect for Dyslexia so that the child can read without confusion about the letters. The program is also very good for students with Asperger's because it focuses on the child's special interests while integrating all the subjects that are needed for a well rounded education. Kids with ADHD love this method because it gets them out of their seat and requires art, activity, and time exploring nature! This program can be used for a wide age range because each student will choose age appropriate books to accompany this workbook. Every child in your family who is reading at a second grade level or higher can use this program, non-readers and dyslexics should complete Dyslexia Games Series A and B before starting this program. www.DyslexiaGames.com Typical mathematics is not included in this learning program, though the child will use and explore numbers in many practical ways every day. Teach a Child to Read with Children's Books Aug 05 2020 This guide shows parents how to combine story reading, phonics, and writing to help their children develop into skilled and motivated readers. The guide discusses how to prepare children for reading success; how to use children's literature to promote learning and enjoyment; why combining book experiences and phonics is better than using either approach alone; ways to use writing to enhance children's reading progress; why reading aloud is important; and which books to use and where to find them. Chapters in the guide are: (1) "The 'Great Debate'"; (2) "Acquiring Language and Learning To Read"; (3) "Early Readers: What Can They Teach Us?"; (4) "What Works? One Successful Program"; (5) "Using 'Real Books' in Your Program"; (6) "Preparing for Formal Lessons"; (7) "Book Reading and Strategy Development"; (8) "Learning about Letters, Sounds, and Words"; (9) "Story Writing in the Reading Lesson"; and (10) "Putting It All Together: A Sample Lesson." Contains 79 references. Appendixes present a 600-item bibliography of children's trade books; a special note for Christian educators; and advice on establishing a tutoring project. (RS)

Busy Toddler's Guide to Actual Parenting Oct 26 2019 You don't need to feel alone in parenting. You don't need to feel like you're failing. And you definitely don't need another parenting book filled with theoretical advice about theoretical children. You need actual parenting help from an actual parent. It's time to feel confident in your parenting. Susie Allison, creator of the massive online community Busy Toddler, is a breath of fresh air. With her humor and engaging personality, she helps parents find their footing, shift their perspective on childhood, and laugh at the twists and turns of parenting we all face. (Yes, it's ok that your child licked a shopping cart - they pretty much all do that.) In *Busy Toddler's Guide to Actual Parenting*, Susie gives the achievable advice she's known for around the world, from daily life and #beingtwofine to tantrums and tattling and teaching the ABCs. The book also includes 50+ of her famous activities that have helped thousands of parents make it to nap time--FYI, the popsicle bath is a game-changer. Susie shares real moments raising her three kids as well as her professional knowledge from eight years as a kindergarten and 1st grade teacher. Her simple and doable approach to parenting will leave you feeling so much better! Let Susie give you the actual parenting advice you need.

This is a SPRING & SUMMER Flowers Journal, but you can use it any time of year. It will last for three months if you use it 20 days per month, each lesson includes about 5 or 6 pages of homeschooling activities. Be sure to get the Autumn & Winter Journal too! Kids don't realize that this is a structured homeschooling curriculum, it's just so fun! This Curriculum Journal is geared toward ages 9 to 14 - Students must be able to read on a 2nd grade level to get the most out of this method. Younger children will need more help, older students can work independently. For grade level learning: Use the appropriate library books, movies and tutorials to customize the lessons for the child's age, interests, grade level, educational goals and learning challenges. This Homeschooling Curriculum Journal is for girls who love to learn using a variety of methods, and for moms who want their kids to be more independent with their schoolwork. Mom only needs to help for the first few days, and then the student can "Do-It-Herself". This workbook includes over 400 pages! This creates 60 days worth of lessons and activities, that is about two hours of guided learning time every day. Now you can learn everything you need to know with library books, movies and YouTube tutorials! Learn from nature. Be creative. Use your own imagination while studying up to 8 Subjects! This homeschooling journal will guide you through your stack of educational books and movies! This book includes many activity pages: Spelling Practice, Math Practice Pages, Reading Time, Film Study, Meal Planning, Copywork, Listening Time, Observation Time, Emotion and Mood Evaluation, Nature Study, List Making, Therapeutic Coloring, and several other fun and educational activities. Choose library books about anything you want to study including books about science, travel/geography, literature, cultures, skill building, math, inventions, history, and any other topic that is interesting or necessary. Parents! Now your student can turn any stack of books into a homeschooling curriculum. This handbook is an activity book and daily journal that allows your student to have a customized education without creating a lot of extra work for you. Many students are more interested in real books than in textbooks! This is an excellent way to help your students to develop their talents, interests and deepen their knowledge of topics that are meaningful to them. Just visit the library and bring home 8 great books! This homeschooling handbook was created by Sarah Janisse Brown, a dyslexia therapist and game designer with ten children. Sarah has over 25 years of homeschooling experience. This book's interior is different from all our other journals, except "Spring Homeschooling" We have two covers for our spring interior, most of our journals are based on a 6 week plan - this one is a 12 week plan.
