Kasher in the Rye Oct 04 2022 Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But KASHER IN THE RYE is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control-his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

A for Anything Feb 02 2020 We call it a gismo. That's right, a gismo. A bit difficult to describe. Like a cross, I suppose, without the top part. Sort of two arms on a stand. What happens is this. You hang something on one arm. Anything at all. A watch, a bracelet, money, anything. I supposed you could hang a locomotive on, only it's a bit heavy. But anyway you hang something on and there on the opposite arm appears an exact replica. And I mean exact. You can't tell the difference. So nobody need make anything any more. What you need you hang on the gismo. No work. No want. No starvation. No nothing. When you've got a gismo, you've got everything.

Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? Marginalised Communities in Higher Education Aug 02 2022 "Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

Gastrointestinal Pathology Dec 26 2021 There have been many advances in the field of gastrointestinal pathology which are of considerable clinical significance during the 13 years since the last publication of a volume of Current Topics in Pathology devoted to this subject. Many have arisen from the application of new techniques of histochemistry, immunocytochemistry, quantitative morphometry and molecular and cell biology to gastrointestinal diseases, but some, notably the recognition of the association of *Campylobacter pylori* with the commonest type of chronic gastritis, have been achieved using such long established 'routine' histological procedures that one wonders how their significance has escaped recognition for so long. The topics covered in this volume have been selected because they present advances of relevance to the diagnostic clinical pathologist. However, they represent the personal selection of the editor, and are in no way exhaustive. Many other examples of progress in our understanding of the pathophysiology of gastrointestinal diseases have been omitted, either because of the confines of space or because they have been well reviewed recently in other publications. Most of the workload of the practising gastrointestinal pathologist involves the diagnosis and assessment either of inflammation or of neoplasia in the alimentary tract, and this is reflected in the topics presented in this book.
