*Mother of Rebellion* Feb 08 2021 The breaking was only the beginning... Rebellion brews as nations struggle for power. Survival is pitted against compassion, duty against faith, and loyalties against love. The Schism, a war that raged a thousand years ago, left the continent of Leyumin broken. Near constant war and destruction define the millenium afterward, but the heavens have promised reunification and with it peace. Now, two nations vie for dominance and the title of Unitor. One does so through politics and manipulation, the other through brute force and self-proclaimed pure blood. Five unlikely people will shape the things to come: a slave-wife, a warrior, a guardian of history, a disciple, and a young nobleman. As they embark upon their journeys, their decisions sow the beginnings of change, and the consequences they reap prove to be more than they're prepared to handle. Meanwhile, all wait in anticipation for the Unitor to emerge as the future looms uncertain.

**The GMO Deception** Sep 15 2021 Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

*The Book of L* Sep 27 2022 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and o (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

**Paleo Diet for Beginners** Feb 20 2022 Creamy Chicken Zucchini Fettuccine Ingredients 1 small onion, chopped 2 cloves garlic, minced 1/2 tsp Himalayan or fine sea salt 1/2 tsp freshly cracked black pepper 1 large head (600g) cauliflower, roughly chopped 2 cups chicken stock 1 tbsp Dijon mustard 2 tbsp nutritional yeast 2 tbsp white balsamic vinegar the juice of 1/2 lime 1 tsp capers 225g mushrooms, sliced 450g leftover cooked chicken, chopped (I used grilled chicken) 1/4 cup fresh parsley, chopped (to garnish) 2-3

large zucchinis, peeled and julienned Instructions 1. Peel the zucchini (or not, I peeled mine just for the look and munched on the peels while I was cooking) and cut them into wide julienne strips with a mandolin. Set aside. (I used the wider setting of my mandolin to create Fettuccine-like "noodles," but you could also do finer noodles with the thinner setting or you could also use a vegetable spiralizer.) 2. Add onion, garlic, salt and pepper to a medium saucepan. Cook over medium heat for one or two minutes, until fragrant and slightly softened. 3. Throw the cauliflower in and continue cooking for a minute or two. 4. Add chicken stock, cover and bring to the boil; lower heat and continue cooking until the cauliflower is tender, about 5-7 minutes. 5. Meanwhile, cook the mushrooms in a large skillet until nice and golden. Add chicken and continue cooking until heated through; Reserve. 6. Ladle the cauliflower mixture into your blender; add Dijon mustard, nutritional yeast, balsamic vinegar and lime juice and process on high speed until super smooth and silky in consistency. Throw in capers and pulse 2-3 times just to mix them in and break them down a little. Pour that cauliflower mixture over the reserved chicken and mushrooms and bring to a simmer over low-medium heat.
